

Three Boxes

Build a screen with three colored shapes stacked on a colored panel. Match the layout on the board — the content inside is yours.

What yours must have

CAPSULE

Your name and age

One line of text, so a pill fits it.

CIRCLE

Favorite emojis

At least three, stacked and large.

ROUNDED RECT

Favorite foods

At least three of them.

Checklist

- ☐ A colored panel sits behind everything, made with a ZStack
- ☐ All three shapes sit in one VStack
- ☐ Each shape has a different background color
- ☐ Each shape uses a different clipShape
- ☐ No text is cut off, especially inside the circle
- ☐ The text is readable against the color behind it
- ☐ Nothing touches the edge of the screen

Order matters

Padding, then background, then the rounding. Swap any two and it looks wrong.

```
.padding()  
.background(.blue)  
.clipShape(  
  RoundedRectangle(  
    cornerRadius: 20))
```

Shapes you can clip with

```
Rectangle()  
RoundedRectangle(  
  cornerRadius: 20)  
Capsule()  
Circle()  
Ellipse()
```
